PROFESSIONAL SUMMARY

MERN Stack Developer with 2+ years of experience building scalable, production-grade web applications using MongoDB, Express.js React.js, and Node.js. Experienced in designing RESTful APIs, implementing responsive front-end architectures, optimizing application performance, and working in Agile environments. Hands-on experience with cloud-based deployments, CI/CD awareness, and collaborative development in enterprise environments.

EDUCATION

Chandigarh Engineering College, Landran ***July 2017 – July 2021***

Bachelor of Technology, Computer Science *GPA – 7.6*

EXPERIENCE

INFOSYS **Sept 2021 – Present**

Technology Analyst (MERN Stack Developer) *Mohali, Punjab*

- Designed and developed scalable MERN stack applications serving enterprise-level users.
- Built reusable and responsive UI components using React.js, improving page load performance.
- Developed RESTful APIs using Node.js and Express.js with MongoDB for efficient data handling.
- Optimized backend APIs and database queries, reducing response time and performance bottlenecks.
- Collaborated with cross-functional teams in Agile environment to deliver features on time.
- Conducted code reviews and enforced clean code and best development practices.
- Contributed to CI/CD awareness and deployment workflows in enterprise applications.

AllSoft Solutions and services Private Limited **Jan 2021 – Jun 2021**

Software Developer Trainee *Mohali, Punjab*

- Completed a 6-month hands-on internship focusing on Java Full Stack development.
- Gained practical experience in Core Java, object-oriented programming (OOP), and backend development.
- Developed web application components using Java, JSP, Servlets, HTML, CSS, and JavaScript.
- Worked with relational databases using SQL for data storage and retrieval.
- Learned end-to-end application flow including frontend, backend, and database integration.
- Assisted in building and testing REST-style backend logic and CRUD operations.
- Collaborated with mentors to understand application architecture, debugging techniques, and clean coding practices.
- Improved understanding of full-stack development lifecycle and software engineering fundamentals.

Technical Skills

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Redux, Node.js, Express.js, HTML5, CSS3, Bootstrap
Databases: MongoDB, SQL, Oracle
Tools & Platforms: Git, GitHub, SVN, Postman, VS Code, Chrome DevTools, Robo 3T, Firebase, CI/CD (basic), Docker (exposure)
Concepts: RESTful APIs, Microservices (basic), System Design fundamentals, OOP, Data Structures & Algorithms, Clean Code Principles, Performance Optimization

PROJECTS

DevTinder App

Tech Stack: MongoDB, Express.js, React.js, Node.js

- Developed a full-stack MERN application enabling developers to discover and connect with nearby developers based on location.
- Implemented secure user authentication and authorization workflows using backend APIs.
- Designed and developed RESTful APIs using Node.js and Express.js to handle user profiles, connection requests, and match logic.
- Built Tinder-style swipe functionality allowing users to send, accept, or reject connection requests.
- Integrated MongoDB to manage user data, connection requests, and match status efficiently.
- Utilized React Hooks and Context API to manage global state and improve application scalability.
- Implemented responsive UI to ensure seamless user experience across mobile and web devices.
- Deployed the application using cloud-based services with familiarity in AWS cloud fundamentals.

Food Delivery App

Tech Stack: React.js, HTML5, CSS3, Bootstrap

- Developed a responsive food ordering web application using React.js and Bootstrap with real-time cart state updates.
- Built reusable and modular UI components to improve code maintainability and accelerate feature development by 30%.
- Implemented intuitive user experience (UX) patterns and smooth client-side navigation to enhance usability across mobile and web devices.
